

# Value Proposition for Partners

SUPPLY CHAIN SUSTAINABILITY  
**SCHOOL**

# Your gateway to unlocking value in the supply chain

The Supply Chain Sustainability School (the School) provides targeted learning and knowledge sharing opportunities to address sustainability issues including climate change, carbon management, materials, waste, water, biodiversity, ethics, community, human rights and modern slavery to name a few. The resources are free to all supply chain members.

### **The School provides you and your supply chain with:**

- a comprehensive online learning platform that helps construction and infrastructure suppliers and sub-contractors to develop their sustainability knowledge and competence
- a means to address learning and competence efficiently across tiers of the supply chain
- a wide range of e-learning modules, plus unique management systems to track progress
- opportunities for involvement at supplier development days and sustainability workshops
- groups and initiatives within the wider Supply Chain Sustainability School network focused on particular topic areas.
